Subject: New Indy Update: Steam Stripper Offline
Attachments: 2021-09-15 Steam Stripper Optimization Trial Request (FINAL)3.pdf

Good morning

This is a heads up that New Indy notified SC DHEC that they are planning scheduled maintenance on the Steam Stripper to be offline for 8 days (starting September 18th through September 26th) and will route condensate to the Aeration Stabilization Basin (ASB). The Mill plans to take preventative steps to minimize odor emissions from foul condensate treatment at the ASB during the steam stripper maintenance shutdown. The letter outlines the preventative measures the Mill plans to take to minimize odor emissions while the steam stripper is offline.

Our internal team ECAD and ORC are discussing our options internally. DHEC is also determining their options as well. Please see the attached letter.

Thanks
keriema
